Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

ICPSR PROCESSING NOTES FOR #37106
The Irish Longitudinal Study on Ageing, 2014-2015

1. **Extent of Processing:** These data are being released in BETA version to facilitate early access to the study for research purposes. The collection has not been fully processed by ICPSR at this time; the original material provided by the principal investigator were only converted to other file types for ease of use. As the study is processed and given enhanced features by ICPSR, users will be able to access the updated versions of the study. Please report any data errors or problems to user support and we will work with you to resolve any data-related issues.
2. **Statistical Software Limitation :** In order to produce R data files, the non-ASCII currency character € was changed to E, and is present in:
 - a. Variable Labels for **TC008** and **TC011**
 - b. Value Labels for **AS104**, **AS118**, and **HU034**
3. **Related Data Collections:** This collection is related to The Irish Longitudinal Study on Ageing (TILDA), 2009-2011, ICPSR 34315 and to The Irish Longitudinal Study on Ageing (TILDA), 2012-2013, ICPSR 37105. For similar study information and characteristics, please refer to the additional studies.
4. **Additional Information:** For additional information on The Irish Longitudinal Study on Ageing, please visit the [TILDA](#) website.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
